JOHN B. TRIVETT,

Government Statistician.

Bureau of Statistics,

36 Young-street, Sydney, 15th August, 1911.

## MEMORANDA.

**Trade.**—The oversea imports during July were valued at £2,731,447, which shows an increase of £496,860, or over 22 per cent., as compared with the corresponding month of last year. The total for the seven months was £15,334,934, an increase of £2,871,099, or over 23 per cent. over the corresponding figures for 1910. There were increases in most of the principal articles—apparel and soft goods, cordage and twines, metal manufactures, machines and machinery, and timber.

The oversea exports for July amounted to £1,614,137, being an increase of £110,581, compared with the corresponding month of last year. For the seven months there was a decrease in the oversea exports of £1,373,138, or over 8 per cent., as compared with last year.

Principal increases during the seven months were— £

Butter...	...	...	...	246,331
Minerals	...	...	...	420,372

Principal decreases during the same period were—

Wool ...	...	...	...	1,718,347
Other Pastoral Produce	...	...	...	215,117
Wheat and Flour	...	...	...	132,264

Separating merchandise from gold, the exports of the former during the seven months decreased by £1,509,422 and the latter increased by £136,284.

**Imports at Sydney.**—Excluding the value of the imports from State ports, the articles imported at the port of Sydney in July were valued at £3,302,323. The following is a summary of the imports during the month :—

	Weight.	Measurement.	Value.
	tons.	tons.	£
Imports Oversea ... ..	34,482	84,112	2,629,573
" Interstate... ..	19,353	18,647	672,750
" From State Ports ...	106,657	14,698	Not available.
Transshipments—			
Oversea... ..	8,741	10,837	"
Interstate ... ..	22,545	3,189	"
To State Ports ... ..	2,644	3,416	"

A few special articles, denoted by number in the detailed table within, have been converted into weight or measurement, and are included in the above statement. During the seven months ended July, 1911, the oversea imports were valued at £14,798,833, and the Interstate imports at £4,723,432, the total of the two being £19,522,265.

**Public Finances.**—The Public Accounts for July show that the net revenue for the month was £1,049,244, or £261,033 more than in July of last year, largely due to the amount returned by Commonwealth.

Principal increases during July were—

	£
From Commonwealth Returns ...	167,460
„ Taxation ...	33,918
„ Railways and Tramways ...	50,290
„ Sydney Harbour Trust ...	4,982

Principal decreases during July were—

	£
Lands ...	4,191
Water and Sewerage Rates ...	577

The expenditure during July was £1,258,982, an increase of £114,338, as compared with July of last year.

Principal increases during July were—

	£
Government Departments ...	17,811
Business Undertakings ...	85,131
Interest Repayments ...	11,396

On the 31st July, 1911, the Consolidated Revenue Account was in credit to the amount of £181,043.

**Railways.**—The report on the Railways for the year ended 30th June, 1911, shows that the earnings amounted to £6,042,205, and were £556,490 larger than in the preceding year. The working expenses were £3,691,061, the balance being £2,351,144, or £141,838 more than in 1909-10. After paying working expenses and interest on capital, there was a surplus of £553,998. The proportion of working expenses increased from 59·73 to 61·09, while the profit represented a return of 4·61 per cent. on the capital expended, which is £50,971,894. With the exception of the carriage of live stock and fodder, all classes of traffic contributed to this result, which is very satisfactory, considering the heavy repairs and renewals, cost of duplications and deviations, reductions in passenger fares and in the rates for the carriage of goods and live stock. The total earnings for all lines of Tramways amounted to £1,365,631, and the working expenses to £1,143,949, leaving a surplus of £221,682, equivalent to a return of about 4·33 per cent on the capital invested.

**Banks.**—The banking averages for the quarter ended 30th June show steady expansion of business, the principal feature being the extraordinary increase in the amount of deposits both for the quarter and the year, although during the winter quarter the banking accounts of the public are usually limited. The total deposits have never been so high, and compared with the corresponding period of last year, there was an increase of £2,472,643 in current accounts, and in deposits as a whole, of £5,171,453. Reserves of coin and bullion were £1,544,367 greater. Advances increased by £1,281,735 during the quarter, and during the year by £4,973,608. The proportion of cash, bullion, and notes to total liabilities now stands at over 28 per cent.

**Savings Banks.**—The latest returns show that at the end of June, 1911, there were 522,251 depositors, having £23,381,014 on deposit. This shows the large increase of £2,557,250 in deposits during the year 1910-11. The average amount on deposit was over £44 per depositor.

**Postal Communication.**—The figures for 1910 show that 163,754,000 letters and post cards were carried during the year. This represents the very high proportion of 100 per head of population, which is exceeded by very few countries. The number of post offices was 2,437, and there were 17,615 miles of telegraph and telephone lines open. There was on the average one post office to every 672 of the population.

**Mineral Production.**—The value of the minerals exported from New South Wales during the second quarter of 1911 amounted to £1,972,191, an increase of £623,755 on the figures of the previous quarter, and during the first six months to £3,659,166, which shows an increase of £579,169 as compared with the corresponding period of last year. The output of silver, zinc concentrates (included in this table for the first time) and copper, shows satisfactory increases in value, and the exports of tin, although 210 tons less in quantity, exhibits an increase in value of £4,252, owing to the enhanced price. The returns of coal for the six months show comparative increases of 422,799 tons and £240,983 in value, but the output for the first half of the year 1910 was somewhat restricted through labour difficulties.

The gold yield during July was 15,361 oz. crude, equal to 13,305 oz. fine, valued at £56,517. The value of gold produced during the seven months was £432,791, and showed a decrease of £13,188, as compared with the corresponding period of 1910.

**Autumn and Winter Lambing.**—From reports furnished by the Inspectors of Stock it is estimated that at the end of 1910 the number of ewes in the State was 21,504,000, and of these 12,674,000, or 59 per cent., were requisitioned for the autumn and winter lambings. Ewes to the number of 9,921,000 were timed to lamb in the autumn, the result being that 7,961,000 lambs were dropped, representing 80 per cent. of the ewes, and it is estimated that the markings will reach 6,977,000, or 70 per cent. The winter lambing was not quite so satisfactory, as 2,753,000 ewes produced only 2,135,000 lambs, or 78 per cent., and the probable markings will not exceed 1,853,000, representing only 67 per cent. of the ewes. As compared with the previous year, the season on the whole appears to have been more favourable, and, although the percentage of births is similar, the probable markings will be about 5 per cent. higher than in 1910.

Full particulars will be found on reference to Table No. 57.

**Prices.**—The general index number for July was higher than that of June, but slightly lower than for the corresponding month of last year. The index number for pastoral produce was 1,192, for metals 1,202, and for all articles 1,191. During the month, the prices of butter, wheat, wool (both greasy and scoured), tallow, hides, and lead advanced; but flour, sheep-skins, silver, and tin declined in value; other articles remained at the same level as those ruling in June.

**Land Selections.**—During July 108 new settlers applied for 55,741 acres; and 50,251 acres, representing 60 blocks, were set apart for residential settlement. Since the beginning of the year, the number of new settlers has been 784, and the area applied for 517,621 acres. The original area set apart for residential settlement since the 1st January has been 343,809 acres, representing 431 blocks.

**Meteorology.**—During the month of July beneficial rains were experienced almost throughout the State, with the result that fully three-fourths of the total area, including the greater part of the "wheat belt," and of the western division, have had falls in excess of the average. The eastern districts, more particularly the Hunter and Manning, and the southern coast and tablelands were most favoured, the excesses varying from 2 to 10 inches, but a large portion of the central districts, and the southern half of Riverina, were not so fortunate.

On the whole, the temperature was mild, although some very low readings were registered at the beginning and towards the latter end of the month.

At Sydney the lowest temperature was 39·5 degrees, and the total rainfall received, 771 points, was about 3 inches below the average.

**Vital Statistics—Sydney and Suburbs—July, 1911.**—The Births registered numbered 1,468, equal to 27·12 per 1,000 of population; of the total, 724 were males and 744 females. The rate is very satisfactory, being the highest for the month of July since the year 1897.

The total Deaths numbered 758, namely, 412 males and 346 females, equal to a rate of 14·40 per 1,000 of population, being the highest for the month of July since 1899, and about 3 per cent. above the average mortality rate for the previous five years.

The Infantile mortality was 80 per 1,000 births, and was 5 per cent. above the average for the previous five years.

# Statistical Bulletin—July, 1911.
